90% of discount cartridges end up where they shouldn't.[1]

They ultimately end up in landfills—or worse. That's because most remanufacturers fail to collect their own products. Customers have returned and recycled 446 million HP ink and LaserJet toner cartridges worldwide since the HP Planet Partners program began in 1991. No Original HP cartridges returned through HP Planet Partners are ever sent to a landfill, and HP never refills or resells Original HP cartridges.
